FEED BACK STUDY ON STUDENT TEACHER INTERACTION FOR BATCH 2016 AND BATCH 2017

Level of teacher student interaction during theory lectures was ascertained from both the batches. 27(45%) students of 2016 batch rated teacher student interaction ≥ 4 on Likert scale, whereas, 51(69.86%) students of 2017 batch rated teacher student interaction ≥ 4 on Likert scale. This shows that interaction between students and teachers during the classes is increasing.

The amount of teacher student interaction could not be quantified but methods like asking questions,

brainstorming and buzz groups were used to stimulate and motivate students towards better learning.
